EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Brian Hennessey on August 17, 2005.
3. The application has been amended as follows:
4. - Claims 16-21 have been cancelled by the applicant.
5. - In claims 1-3, 5, and 9, the Attorney stated that "*positionably*" had been misspelled as "*positionably*". All occurrences of "*positionably*" will be replaced in the claims by the term "*positionally*".

In claim 1, line 2, delete the whiten space.

In claim 1, line 7, replace "*positionably*" with --*positionally*--.

In claim 1, line 9, replace "*positionably*" with --*positionally*--.

In claim 1, line 11, replace "*positionably*" with --*positionally*--.

In claim 2, line 2, replace "*positionably*" with --*positionally*--.

In claim 3, line 3, replace "*positionably*" with --*positionally*--.

In claim 5, line 3, replace "*positionably*" with --*positionally*--.

In claim 9, line 3, replace "*positionably*" with --*positionally*--.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The examiner considered the Applicant's Amendment filed on 4-18-2005 and after updated search, no other prior art of record has taught that which was presented in the amended claims
3. Therefore, claims 1-15 and 22 are allowable.
4. Independent claims 1, 11, and 22, when considered as a whole, are allowable over the prior art of record (Berstis, Patent #6,018,345, hereinafter Berstis345 and Berstis, Patent #5,920,304, hereinafter Berstis304). Berstis345 teaches a data processing system for connection to a network comprising: a data processing unit (see Berstis345 column 2, line 15 and figure 2), a display (see Berstis345 column 1, line 58), a controller (see Berstis345 column 2, lines 55-59), and a display capable of displaying a website downloaded from the network (see Berstis345 column 1, lines 51-59). Berstis345 further teaches, in column 1, line 51 through column 2, line 3, a cursor that can be presented in a different manner (upon the cursor being moved over a link) so as to allow selection from an input device. Berstis345 further teaches, in figure 2, in column 3, lines 51-67, column 6, lines 6-26, and column 6, lines 10-45, a guidance picture which is overlaid on an internet web page containing links, wherein when positioned over a link providing the display with a selection means from the controller. Berstis345 further teaches, in column 3, lines 54-59, that selection of the "GO" button links to the selected page, while selection of the "BACK" button links to a page a user previously visited. Berstis345 further teaches, in column 6, lines 10-16, the pointer icon

closely resembling the actual buttons on the remote. Berstis345, however, doesn't specifically teach a plurality of options identified by icons arranged around a hyperlink. Berstis304 teaches a system in which a cursor changes appearance as scrolled over a link (see column 6, lines 35-54), similar to that of Berstis345, but further teaches the cursor's ability to display a plurality of items activatable by the remote (see column 6, line 55 through column 7, line 6). It would have been obvious to one of ordinary skill in the art, having the teachings of Berstis345 and Berstis304 before him at the time the invention was made to modify the cursor display system of Berstis345 to include the multiple selectable icons around a link, as did Berstis304. One would have been motivated to make such a combination because this would allow the user more insight to which items are preferably selectable when over a particular link. Berstis345 and Berstis304 teach that a visual display can be provided to a user containing an option that, when selected, links a user to the contents of the specific hyperlink they are positioned over, however, specifically the prior art of record fails to clearly teach or support the limitations of the "plurality of options including at least an option effecting a connection to a network address specified by a hyperlink other than said one of said at least one positionally selectable hyperlink".

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
